🗓️ Date of Birth: 03/05/2002

Profile

Cybersecurity Engineering student at Tekup University, passionate about network security, secure application development, and cloud solutions. Certified in penetration testing, RedHat administration, and AWS Cloud, with proven experience in building and securing applications using Python, Java, PHP, and C++. Strong analytical thinker with excellent problem-solving, teamwork, and leadership skills.

Education

Tekup University – Engineering Cycle in Cybersecurity (2023 – 2027)
Specialized in Cybersecurity Engineering with focus on secure architectures, penetration testing, cloud computing, and system administration.

Certifications

• eJPTv2 – Junior Penetration Tester (2025)
• RHCSA – RedHat Certified System Administrator (2025)
• Mini Master in AWS Cloud (2024)

Experience

Intern – Application Maintenance | CNAM Tunisia (2025)
- Assisted in the maintenance and optimization of internal applications.
- Debugged issues, applied security patches, and supported end-users.

- Collaborated with the IT team to ensure application reliability and performance.
- Gained hands-on experience with software maintenance, database management, and troubleshooting.

Intern – Network Configuration | Telecom Tunisia (2023)
- Contributed to the configuration and maintenance of network infrastructures.
- Assisted in setting up routers, switches, and VLANs.
- Learned about network troubleshooting, IP addressing, and routing protocols.
- Gained practical exposure to telecommunication systems and network security basics.

Projects

PharmaSync – Medication Synchronization Platform *(Python, Flask, SQL)*
- Developed a secure web application for synchronization between pharmacies and depots.
- Designed the backend with Flask and implemented SQL database for stock tracking.
- Integrated authentication and role-based access control.

AI Car Damage Scanner *(JavaFX, Flask, Python)*
- Built an application that scans car crash images and suggests repair solutions using AI.
- Used Flask API as middleware and JavaFX for UI.

Secure Symfony Application *(Symfony, PHP, MySQL)*
- Developed a secure web app with authentication and authorization.
- Applied OWASP principles (input validation, session security, encryption).

Network Security Architecture *(Linux, RedHat, Cisco)*
- Designed secure network architecture with firewall rules, VLANs, IDS/IPS, and VPNs.

Hotel Synchronization System *(Qt C++, PHP, SQL)*
- Created a desktop + web solution for hotel reservation synchronization.
- Applied secure communication protocols and encryption.

Skills

• Programming & Frameworks: Python, Java, SQL, PHP, C++, Symfony, Flask, JavaFX, Qt
• Cybersecurity Tools: Kali Linux, Metasploit, Burp Suite, Wireshark, Nmap
• Cloud & Systems: RedHat Linux, AWS Cloud, Docker, Virtualization
• Soft Skills: Problem-solving, Teamwork, Leadership, Adaptability

Languages

Arabic – Native
French – C2
English – C2
German – A2

Extra-Curricular Activities

- Active participation in university cybersecurity workshops and hackathons.
- Contribution to open-source projects on GitHub.
- Continuous self-learning through online courses (Offensive Security, Cloud Security).
